China is now the greatest threat to America.

Soon to be the world’s largest economy, China is attacking on every front, with every available weapon—from protectionism and currency manipulation to cyber attacks and espionage. Around the globe, China is also doing whatever it takes to capture crucial resources—even if it means promoting nuclear proliferation by the world’s most dangerous regimes. Inside the United States, Americans are being injured or killed by the Dragon’s dangerous exports: poisoned food, spiked drugs, toxic toys. Meanwhile, huge U.S. corporations have allied with China’s state-owned enterprises to destroy American manufacturing—and, ultimately and ironically, destroy themselves.

It’s an incredible and incredibly shameful story, and *Death by China* tells it all. But understanding the reality of China’s assault on America is only the beginning. Leading economists Peter Navarro and Greg Autry offer a complete plan for surviving the global power shift China has already engineered—and halting the Dragon’s onslaught before it’s too late.

The world's most populous nation and soon-to-be largest economy is rapidly turning into the planet's most efficient assassin. Unscrupulous Chinese entrepreneurs are flooding world markets with lethal products. China's perverse form of capitalism combines illegal mercantilist and protectionist weapons to pick off American industries, job by job. China's emboldened military is racing towards head-on confrontation with the U.S. Meanwhile, America's executives, politicians, and even academics remain silent about the looming threat. Now, best-selling author and noted economist Peter Navarro meticulously exposes every form of "Death by China," drawing on the latest trends and events to show a relationship spiraling out of control.

Death by China reveals how thousands of Chinese cyber dissidents are being imprisoned in "Google Gulags"; how Chinese hackers are escalating coordinated cyberattacks on U.S. defense and America's key businesses; how China's undervalued currency is damaging the U.S., Europe, and the global recovery; why American companies are discovering that the risks of operating in China are even worse than they imagined; how China is promoting nuclear proliferation in its pursuit of oil; and how the media distorts the China story--including a "Hall of Shame" of America's worst China apologists.

This book doesn't just catalogue China's abuses: It presents a call to action and a survival guide for a critical juncture in America's history--and the world's.

Trump needs this book real bad..

By Max Coderre

Trump needs this book real bad... It is a must read for anyone who wants to understand why our government wants us to equally poor with the rest of the world. No job, we sent them all to China and now we can borrow money to buy the stuff they make for us.

Enlightening and frightening...A must read

By SF

'Death by China' was both highly enlightening and frightening. The book was really well written and articulated a number of serious problems in the US-China economic and political relationship. While it was difficult to internalize the fact that I am a part of the problem (e.g. needing to pay more attention to product origination and lay scrutiny to foreign and trade policies coming out of DC), the content of this book needs to better enter into popular debate.

America (and especially DC) needs to wake up and engage with this issue in a much deeper way. With Navarro appointed to the special trade council and president-elect Trump espousing forthcoming policy changes against China around trade/currency manipulation, I would hope to see more balance on multiple fronts within the problem areas the authors cover in the book.

All I can say is find a way to read this book and in some way engage in solving the problem.

A Picture is Worth a Thousand Words

By Amazon Customer

Too much rhetoric, I almost stopped reading the book several times. There were new ways of looking at

things here and there that kept me reading.

The message is accurate. Death by China scratches the surface.

It is important that facts get compiled and presented to the western world.

Why are there do few sources of compiled data available generally speaking?

Nest of SPIES is written by de Pierreboung, Fabrice, of CSIC (Canadian Security Intelligence Service) with all facts cross referenced or otherwise noted in the text as rumor. There is not much rumor in this book... A bit dry, but factual, looking at the efforts of various countries and their multiple methods of going about commercial and government theft and espionage. Obviously China is now the largest subject surpassing Russia. Eye opening. Recommended reading with Death by China, providing a comprehensive view.

Also recommend watching the 60 Minutes segment on American Superconductor to see an in-depth real work example of issues these books refer to.

I have attempted to upload a picture to my review of the US Embassy in Beijing's main entrance. Notice the embassy has been fenced off by China and has Chinese troops manning the fence from the inside. Back side of the embassy has Chinese WJ soldiers with machine guns inside an armored car in addition to the Chinese fence and troops. A US Citizen or US Embassy Employee can not even get to the embassy's entrance and guards, to the US Embassy land itself, without running through the Chinese gauntlet.

Peter Navarro, I have a lot of good photos for you to chose from for the cover of your next book :)
