Excellent text for undergraduate courses

By Barbara R. Blackburn

Dr. Powell's conversational style is quite reader-friendly. She provides depth of information in a manner that is easy to understand. This book is particularly strong as an undergraduate text for a Foundations of Middle Level Education course.

The book is exactly what it is supposed to be

By Masters in History Education

This book is the philosophical manifesto of progressivism's socialistic indoctrination centers under the auspices of Middle School. John Dewey's dream of progressive (Socialistic) public education has been realized. Marx, Lenin and Stalin would be impressed with the philosophies in this book.

Make no mistake, this book is exactly what it proports to be. That is why it deserves all five stars.

Very broad

By Kenzie

The book makes sweeping generalizations that seems like common sense. However since this was a mandatory book for a grad school class I like it for that purpose. It is an easy read and makes sense. The book is organized and follows coherent conditions determined by national and state teaching needs for Middle School. Yet, in my experience no book can ever teach you as much about teaching as actually being in the classroom.
