Great Book for Home School Science or Biology Studies

By Paulette

As a home school parent I am always looking for good educational books/resources. This book is a great tool

for young and older students alike. The book gives a good description of mantids (who knew there are over 2400 species of them!), their care, costs and tips, all of which is easy to read and understand, especially those learning about mantids for the first time. I would highly recommend this book for home school students!
