## Review

Robert Gottlieb reminds us that cities, and the political actors within them, can and do change. Los Angeles came of age by shoving nature around. But in these early years of the 21st century, grassroots and community action hint that the environmental future of the city and region may not be so dire. Written by a scholar/activist who has been at the center of much of the recent excitement, this book is a scholarly report, a celebration, and a further call to action.

(William Deverell, Department of History and Director, Huntington-USC Institute on California and the West, University of Southern California.)

Bob Gottlieb is an organizer extraordinaire, a practical visionary and a tactical genius. When Friends of the Los Angeles River partnered with Occidental College for a year's worth of collaborative events, one of the great pleasures for me was working with Bob, who has an astonishing ability to work not just a system but all kinds of systems for the public good. A lot of people make fun of the idealism of the late 60's but Gottlieb is one of those whose idealism has only been sharpened and refined by the ensuing years and made more effective. Everybody who reads this book will be inspired to make their community, their city, and the world into a better place, I promise.

(Lewis MacAdams, Friends of the Los Angeles River)

[Gottlieb's] richly informative book is really about flow of resources, people, history and about how we all need to put our hands into that urban stream as participants directing community, a word he sensibly makes very nearly synonymous with environment.

(Orion)

No complaining diatribe, this book proffers solutions and heralds successful programs already in place...Gottlieb dissects and discusses origins, failures, successes, and future ramifications of nature, community, water, transportation, migration, and globalization in the city in a way that is neither preachy nor accusatory, but informative and I dare say inspiring.

(Society & Architectural Historians News)

Robert Gottlieb has long been a pioneer in redefining environmentalism, turning ideas into action, and forging coalitions in the often murky atmosphere of Los Angeles. This book offers a timely account of the promising work in the City of Angels to forge a political movement that integrates social, economic, and environmental health.

(Jennifer Price, author of *Flight Maps: Adventures with Nature in Modern America*)

#### About the Author

Besides, by doing this will likewise boost your life top quality.

# **REINVENTING LOS ANGELES: NATURE AND COMMUNITY IN THE GLOBAL CITY (URBAN AND INDUSTRIAL ENVIRONMENTS) BY ROBERT GOTTLIEB PDF**

Los Angeles--the place without a sense of place, famous for sprawl and overdevelopment and defined by its car-clogged freeways--might seem inhospitable to ideas about connecting with nature and community. But in *Reinventing Los Angeles*, educator and activist Robert Gottlieb describes how imaginative and innovative social movements have coalesced around the issues of water development, cars and freeways, and land use, to create a more livable and sustainable city. Gottlieb traces the emergence of Los Angeles as a global city in the twentieth century and describes its continuing evolution today. He examines the powerful influences of immigration and economic globalization as they intersect with changes in the politics of water, transportation, and land use, and illustrates each of these core concerns with an account of grass roots and activist responses: efforts to reenvision the concrete-bound, fenced-off Los Angeles River as a natural resource; "Arroyofest," the closing of the Pasadena Freeway for a Sunday of walking and bike riding; and immigrants' initiatives to create urban gardens and connect with their countries of origin. *Reinventing Los Angeles* is a unique blend of personal narrative (Gottlieb himself participated in several of the grass roots actions described in the book) and historical and theoretical discussion. It provides a road map for a new environmentalism of everyday life, demonstrating the opportunities for renewal in a global city. Robert Gottlieb is Henry R. Luce Professor of Urban and Environmental Policy and Director of the Urban and Environmental Policy Institute at Occidental College in Los Angeles. He is the author of *Environmentalism Unbound: Exploring New Pathways for Change* (MIT Press), *Forcing the Spring: The Transformation of the American Environmental Movement*, and other books.

progress in Los Angeles

By Erik A. Sterne

This book helps to understand the grass roots movements that are happening all around LA. The culture of water and that of transportation throughout the greater Los Angeles region are better understood in this book that is part history and part social discourse. Los Angeles is a vastly misunderstood metropolis that is gradually coming out from under its stigma as a lost fantasy and emerging as a leader in the new urban environment.

Key read

By C. Hernandez

The book arrived sooner than I expected and in good condition. As a read, this book is a must for anyone interested in understanding local efforts to create a sustainable LA.

Best LA book

By Amazon Customer

Gottlieb is incredible! This easy to read book, was a requirement in one of my classes but honestly no need to require since its like reading a novel. What an awesome book!
