Outstanding book on Belgian aviation in World War I

By Peter Kilduff, book review editor, *Over the Front*

In 1998, Walter Pieters filled a significant void in World War I aviation history literature with his 123-page book *"Above Flanders' Fields."* As the subtitle noted, that volume was "a complete record of the Belgian fighter pilots and their units during the Great War." Based on extensive research and much good luck in obtaining records and previously unpublished photos, *Above Flanders' Fields* was the best English-language volume on the otherwise little-covered Aviation Militaire Belge yet to appear.

The book was also a tough act to follow, but, 12 years later, Pieters has out-done his previous effort with *"The Belgian Air Service in the First World War,"* providing comprehensive coverage and lavish detail. The massive new tome relates the history of the Aviation Militaire Belge from its beginning as the *Compagnie des Aviateurs* [Company of Aviators] and covers all theaters of operations, including flights supporting Belgium's extensive colonial interests in Africa.

But it was on the Western Front that Belgian airmen and units became known for working with American, British and French air units and this book provides a daily chronology of every Belgian air action from 4 August 1914 through 11 November 1918. The narrative is complemented by a 145-page section devoted to 375 "Biographies of Belgian Airmen," which itself is larger than Pieters' previous book and goes beyond fighter pilots. Among the book's excellent appendices is a complete list of confirmed and unconfirmed Belgian aerial victories, as well as listings of the small nation's most active airmen and air casualties. Also

included is a list of German aircraft in Belgium after the war.

The book's more than 1,000 photos (including many in large size format) should interest technology buffs and modelers alike. The variety of aircraft used by Belgian airmen is further highlighted by 81 color profiles (and a page of individual markings) skillfully rendered by James L. Miller. Walter Pieters' "The Belgian Air Service in the First World War" is recommended highly. (This review appears in the Summer 2011 issue of "Over the Front," the quarterly journal of the non-profit League of World War I Aviation Historians.)

THE definitive reference book on the subject

By Michel Jobé

Incredible... this is all I can say when I received my copy of this book. I have never seen such an in-depth study of such an esoteric aviation subject in my life!

Although, as a Belgian citizen, I bought this book with a bias, the quality of this work - text and pictures - will make it appeal to any reader interested World War I.

The book is divided in three parts: a history of the Belgian Air Service in WW1, a day-to-day (!!!) account of operations, and a biography of pilots.

A real brick whose content and pictorial quality unquestionably makes it worth its price...

Outstanding

By J. Sontag

Outsnading! Phenominal! A Masterpiece! I can't think of any other words to descibe how amazing this book is. This book is in three parts. The first part describes the Belgian Air Service before the war and then from 1914-1918. Part 2 is a day by chronolgy of the Av.M. Part 3 is a biography of every pilot and observer who flew during the First World War for the Av.M. The section of artwork of Av.M. Aircraft by Jim Miller is some of the best I've ever seen. Wlater Pieters the author, has created a masterpiece and his 14 years of research is unamatched when it comes to the Av.M. Over 1,000 photographs in this book are absolutely stunning and would never have been seen if it were not for this book. I thank Mr. Pieters for taking the time to research and write this book, and Aeronaut Books for publishing this incredible work. In my humble opinion, this book belongs on every World War I Aviation enthusiast book shelf. Highly recommended.
