From Library Journal

Originally published in the early 1980s, *Civilization* traces the social and economic history of the world from the Middle Ages to the Industrial Revolution, although his primary focus is Europe. Braudel skims over politics, wars, etc., in favor of examining life at the grass roots: food, drink, clothing, housing, town markets, money, credit, technology, the growth of towns and cities, and more. The history is fascinating and made even more interesting by period prints and drawings.

Review

"The intricacy of detail and boldness of hypothesis in this book are indisputable, and if one is to do more than skim it, it demands and repays enormous attention. . . . The lavish illustrations are superbly well chosen. The pictures show the endless variety of commercial dealings of which humans are capable."--Jonathan Spence, "New York Times Book Review

One of the best books I will ever read

By Mr. Nathaniel Singer

Wow, by far one of the best books that I have ever read. I usually do not like history because I prefer to be more proactive and immersed in today's world. But the clarity on our society's current situation that this book

gives by examining the roots of the movement to capitalism is incredible and was so worth my time that I had to take a week's vacation off work in order to make sure that I could focus to read this. The writing conveys only one thing - complete clarity into the world today. It is an incredible opus; I loved it.

There is no easy answer to the challenges we humans face in organizing and creating a shared activity to enable the greatest overall productivity and happiness. The evolution of humanity during the early Renaissance years provides the explanation for where and why we are organized in this way today. Understanding this time in this way (through the lens of the economics of that time period) gives a much greater appreciation for the world today that we have constructed. The most core problems of humanity - social mobility, equitable distribution of resources, stability, and collective cooperation, have never (and may never) become solvable. This book explains these dynamics so eloquently that I wish I had time to read it again and again - much like a great adventure novel that as a kid you just wished would never end and felt a real loss once it did and you had to re-emerge into the real world around you.

Braudel is phenomenal in his depth of understanding about how society of the 15-18th centuries operated. I can't recommend it more highly.

The Wheels of Commerce

By S. D. Haas

Braudel is a rare historian who is very thorough in explaining evolutionary process of civilization. Trading is a factor being human and how our trading history made its mark on our society. This economic history comes in a three volume, a very daunting project which has no competition from other authors. Even better, he is more factual and less opinionated than most historians. Every student of learning must have this set on their bookshelves.

As for the bookseller, the book came promptly and in a condition better than I had expected. The dust jacket covering was an exceptional surprise!
